Theme of the Seminar

Baltic Sea – Sustainable Shortsea Shipping Solutions seminar brings together interests of the intermodal short sea shipping sector in the Baltic Sea region addressing the main challenges the maritime transport faces in this special sea area. Seminar is organized as part of PROPS project.

The Seminar Will Focus on

- Future development of Short Sea Shipping & intermodality in the Baltic Sea taking into account the role of Russian trade and transport.
- New patterns of Short Sea Shipping
- Efficient transportation via optimization of cargo and information technology tools
- Effects of environmental regulations to transport modes

This Seminar is addressed to people and organisations interested in developing Maritime Transport in the Baltic Sea Region and interested in seeing how the shippers can best benefit from intermodal shortsea shipping.

The workshop is organised by the European Coordination Project PROPS, Promotional Platform for Short Sea Shipping & Intermodality and is funded by DG TREN of the European Commission under the 7th Framework Programme. The organisers and participants are solely responsible for the opinions expressed in the workshop, which do not represent those of the European Community.
